FANDOM VIBES / PRIVATE CALIBRATION

Actor preflight lab

Calibrate actor x Vibe Pack pairings against bounded evidence before they enter the Daily Drop rotation.

Operator boundary
One pairing at a time
Every decision leaves a receipt.

Only the current audit run can export an Operator Rescue Board.

9 clean display images **3** queries audited **36** retained results

Operator rescue board

9/9 chosen · 36 available · 0 unavailable · 0 excluded

This is your override. Choose any nine retained, displayable images and arrange them yourself. Composite, duplicate, anti-anchor, and Vibe labels remain visible as algorithm evidence, but they do not veto the rescue. Only unavailable images and your exclusions stay out. The original audit and Daily Drop eligibility never change.

Saved rescue records

Each record is immutable and records-only by default. Explicitly confirm a board as calibration evidence to teach future audits; the historical audit and receipt never change.
